

Face Mask Dataset Report

Nimay N

August 7, 2025

Dataset Overview

The dataset used in this report is the **Face Mask Detection Dataset**, which is publicly available on Kaggle at the following link: [click below](#)

[Face Mask Dataset on Kaggle](#)

This dataset contains images with labels for face mask detection. It is commonly used for classification and computer vision tasks in deep learning.

Dataset Structure

The dataset includes:

- Images with faces wearing masks
- Images with faces without masks
- Categorized folders for easy training/testing

Example Use

You can use this dataset with computer vision libraries like TensorFlow, PyTorch, or OpenCV.
